

2020/2021 Product Updates Roundup 22

Share results with students and manage shop payments

The Headlines

Examinations

In time for this year's results, you can share Statements of Results in bulk via email to primary guardians or candidates directly. Plus if your school uses the Student Portal, you can also share Statements of Entry, Exam Timetables and Statements of Results there too!

Take a look at our article to see how: [Creating and sharing statements of results](#)

Group MIS assessments

Standardise the way you manage assessments across your trust with our brand new assessment feature to roll out summative assessment frameworks and policies.

Take a look at our article to see how: [Roll out assessments](#)

We're also putting the final touches on additional features which will enable you to roll out School Attainment and Progress Target Rules, Target Judgement Rules and School Assessment Measures from Group MIS in bulk.

Bulk invoicing

Managing a shop, uniform payments, ticketing or using vouchers? It's now possible to create invoices for top-up account types in bulk! Just go to **School > Payments > Accounts > Invoices** and click the **Bulk add invoices button** to select the students and account to invoice!

Cover

We've introduced more improvements to help cover managers:

- To help assign cover to half an event, or if the cover requirement has changed, we flag to you any events that are only partially covered. We've updated the cover pages so **Requires Cover** is now red, and our new status of **Cover not fully arranged** is orange.
- When you click into a staff absence, you can see all the cover requirements in a handy table view.
- When editing a recurring event, any changes to the 'requires cover' setting now only apply to future events.

What else is new?

- As well as already being able to add students to interventions from marksheets, you can use a summative assessment mark or baseline in participant criteria for interventions. For example, you might set up an intervention that will automatically add students working below a 4 at GCSE.
- Endorsement Grades are displayed on the **Student Profile > Examinations > Statement of Results** page, and when importing exam results to help you check them.
- If you deselect all exam series when generating candidate timetables, only in-house exams are shown rather than all series.
- On the Group MIS, see all staff contracts for your central team (including pay scales, salaries and FTE hours) from **Group Staff > HR Admin > Staff Contracts**. Add a filter to look at individual roles or active contracts. Download or Live Feed the table to help create things like your gender pay gap report etc.
- Select to display multiple student groups on the **Students > Assessments > Summative Tracking** dashboard.
- On small devices, any slide overs now take up the full screen so you can see all the details.
- The **School > Timetable > All Events** page saves your filters for the next time you return to the page.
- Add additional payments to your central team on the Group MIS from the **Contracts** section of their profile.
- When removing a student's involvement in a behaviour incident, any automatic actions taken as part of incident workflows are also reversed For example, any behaviour points will be removed.

Coming soon...

Assessments

You'll be able to import your Multiplication Tables Check (MTC) results via a CTF, and view them in the DfE assessments area.

School census

Record and report on whether a member of staff is a Newly Qualified Teacher (NQT).

Group MIS

Quickly roll out User Defined Fields across all your schools from the Group MIS site.

We publish a roundup of our releases every other Friday [here](#).

You can also see what else we're working on and make suggestions using [our Roadmap](#).

Why not also join in the conversation in the [Arbor Community](#)?
